

# Academia & Industry & Nonprofits, Oh my!

Angela Hwang, Ph.D.

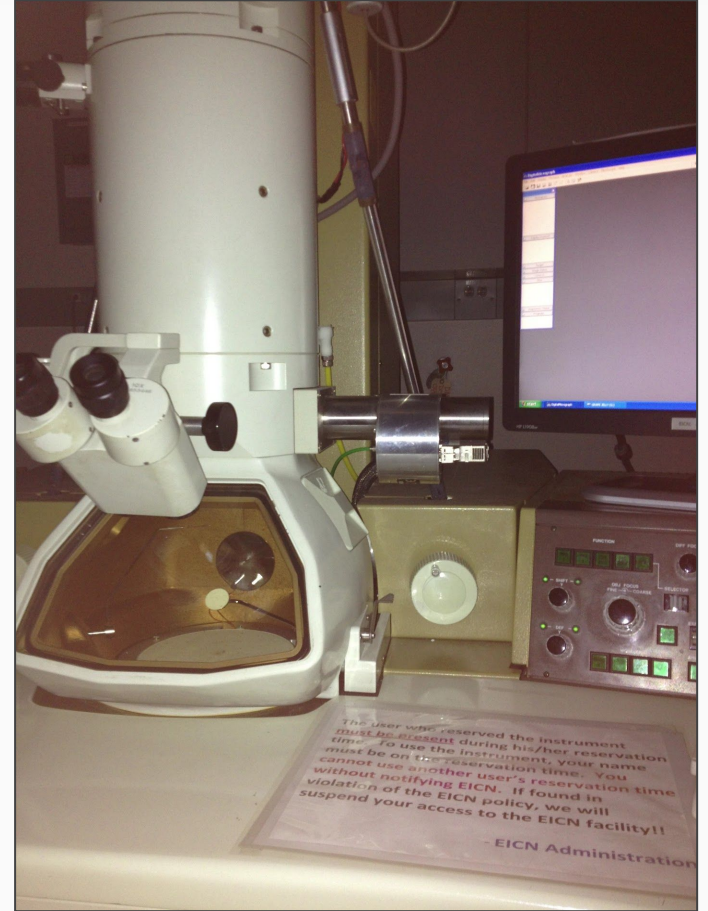

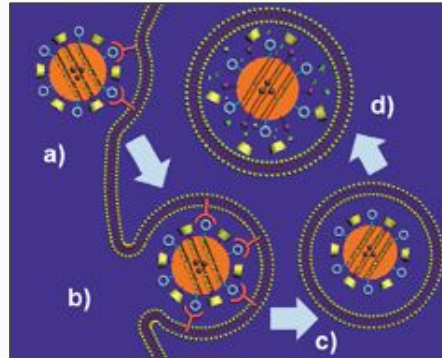

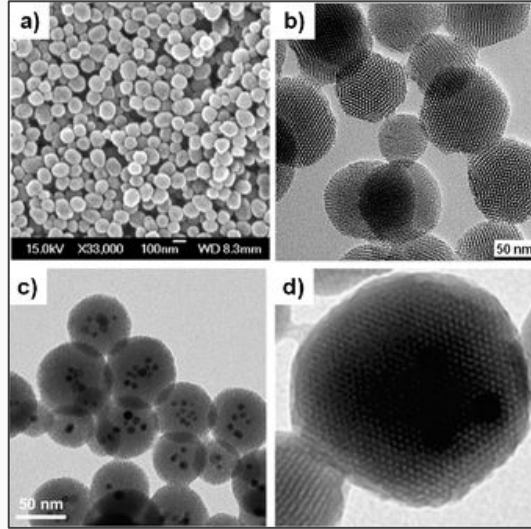

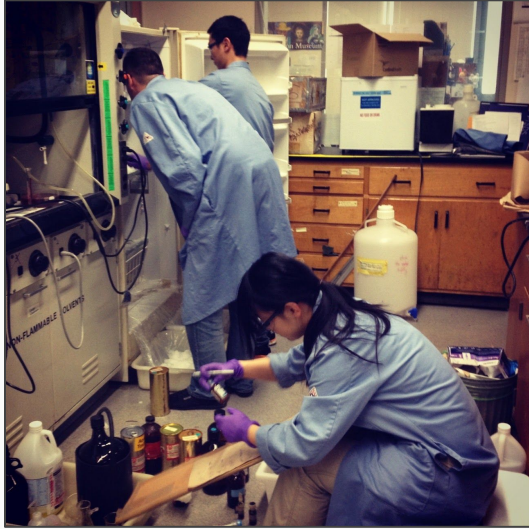

# Timeline

A wide-angle photograph of the Stanford University Main Quad. The central focus is the red brick Main Building, featuring two prominent square bell towers with arched openings. The building has multiple levels of arched windows and a series of smaller arches along its base. In front of the building is a large, well-maintained green lawn. A paved walkway with a brick pattern runs along the right side of the lawn. Several people are visible walking on the lawn and the path. The sky is overcast with grey clouds. The text "Grad school: College 2.0" is overlaid in white on the left side of the image.

# Grad school: College 2.0

# Zink Lab - mesoporous silica nanoparticles for drug delivery

# Outreach, Extracurriculars, and Graduation

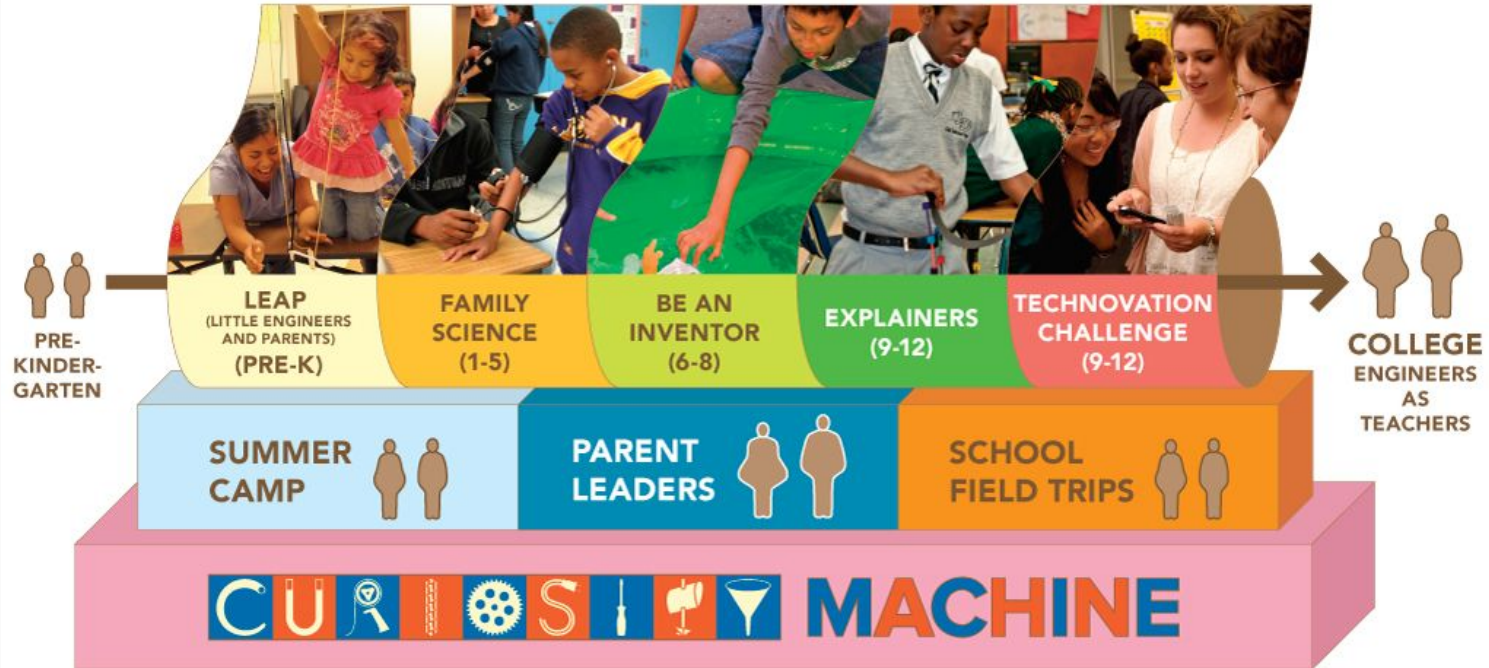

# What I Learned

- Project management
- Problem solving & troubleshooting
- Time management
- Self management
- Self efficacy
- Grant writing process (NSF, DTRA)

**Nonprofits:**  
Like startups, but social  
impact bottom line

# Technovation (formerly known as Iridescent)

curiositymachine.org/challenges/

## Topics

### All Challenges

Inspired by 

 Artificial Intelligence

 Aerospace

 Art of Science

 Biomechanics

 Biomimicry

 Civil Engineering

 Computer Science

 Electrical Engineering

 Food Science

 Materials Science

 Mechanical Engineering

## All Design Challenges

### Design a Sampling Aircraft

Build an aircraft that can collect air samples.

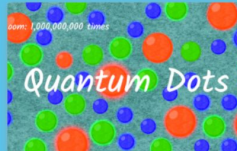

### Make a Nanostamp

Create a stamp to reproduce a drawing from a meter away quickly and accurately.

### Build a Nanopipe

Create a tube that can separate different objects based on how you build the walls.

### Make Identical Quantum Dots

Make spheres that are all the same size.

### Build a Planting Machine

Build a machine that distributes seeds precisely.

### Build a "No Wire" Circuit

Build a circuit using conductive everyday objects

# USC, Family Science, Professional Development

**USC** University of  
Southern California

# Interviewing & making videos with creative teams

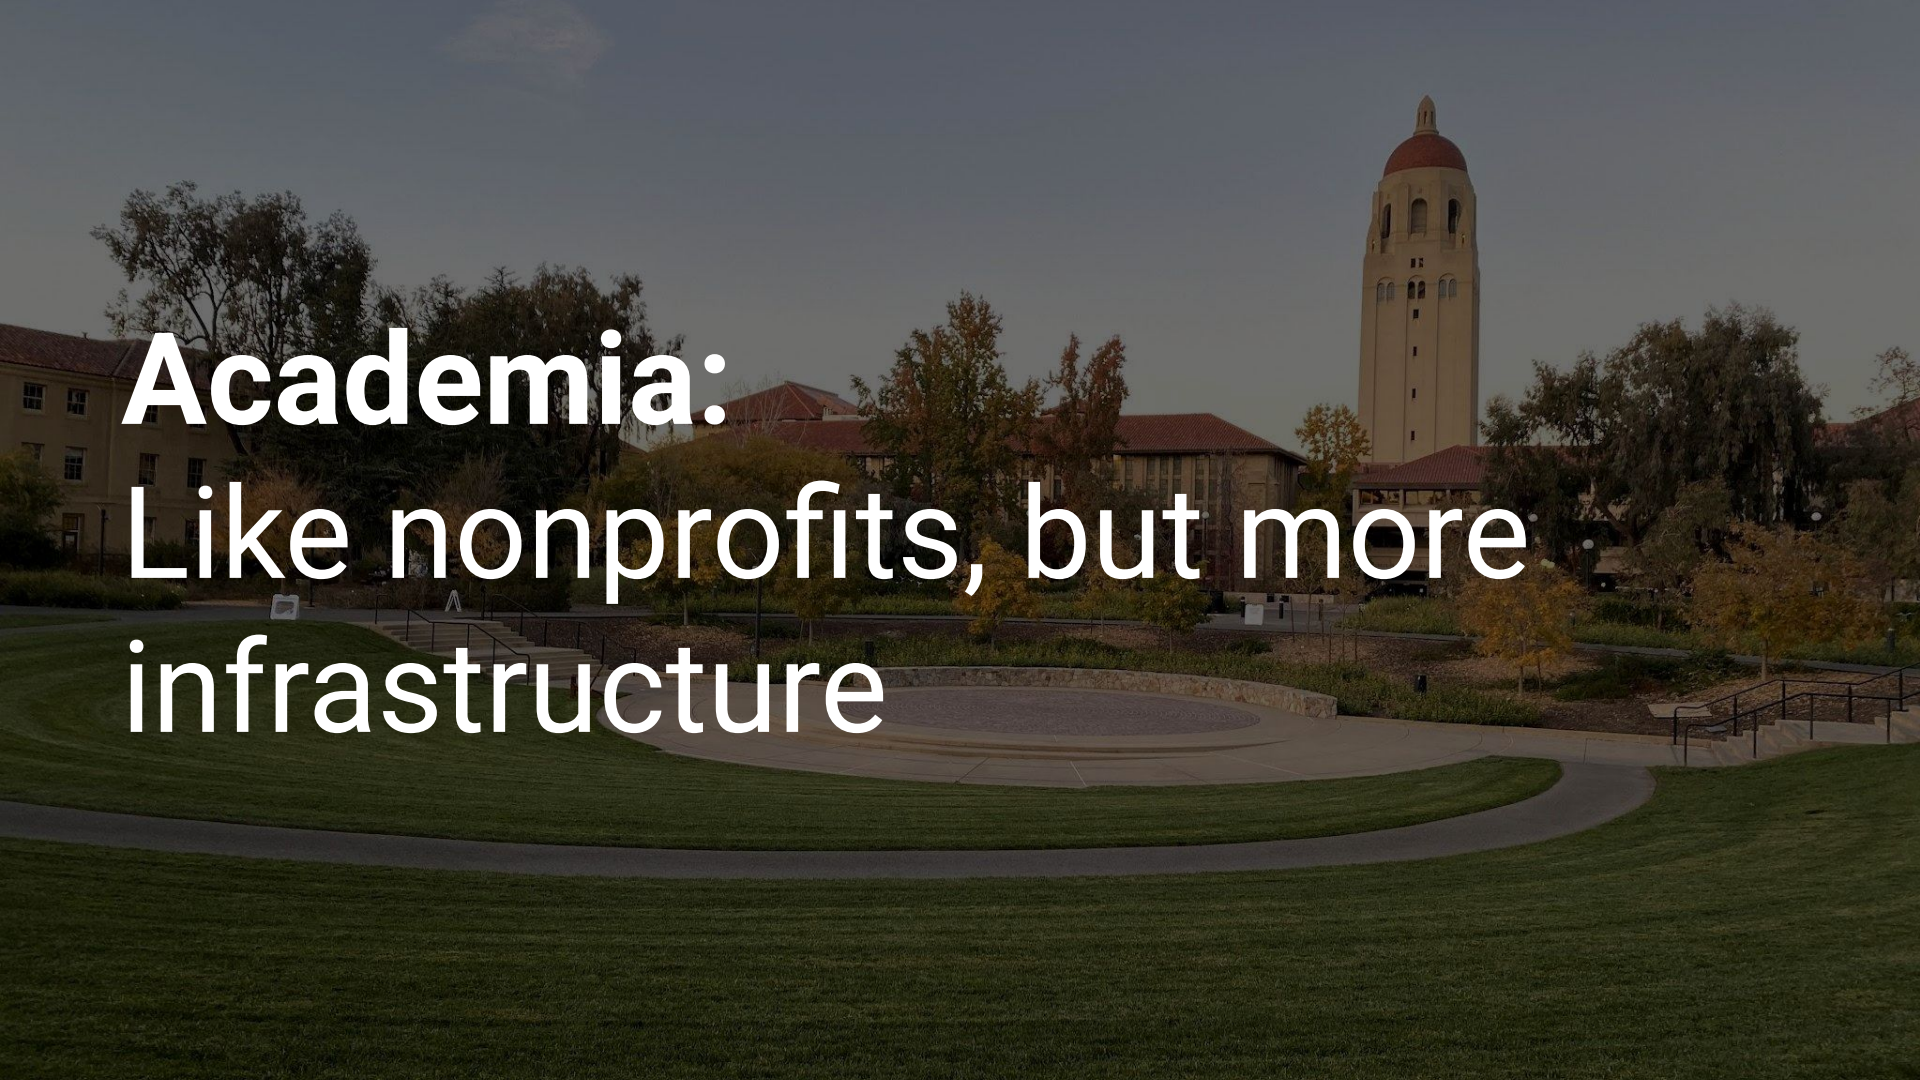

Rensselaer

# What I Learned

- Program management
- Adapting & multiple hats
- Public speaking & communication
- Work travel & TSA precheck
- End to end video production & animation
- Working with different types of people
- Grants & proposals, collaborations

**Academia:**  
Like nonprofits, but more  
infrastructure

# National Nanotechnology Coordinated Infrastructure - NSF Funded

## NNCI Sites

Center for Nanoscale Systems (CNS)

Cornell Nanoscale Science and Technology Facility (CNF)

Kentucky Multi-Scale Manufacturing and Nano Integration Node (KY Multiscale)

Mid-Atlantic Nanotechnology Hub (MANTH)

Midwest Nanotechnology Infrastructure Corridor (MiNIC)

Montana Nanotechnology Facility (MONT)

nano@stanford

Nanotechnology Collaborative Infrastructure Southwest (NCI-SW)

Nebraska Nanoscale Facility (NNF)

Northwest Nanotechnology Infrastructure (NNI)

Research Triangle Nanotechnology Network (RTNN)

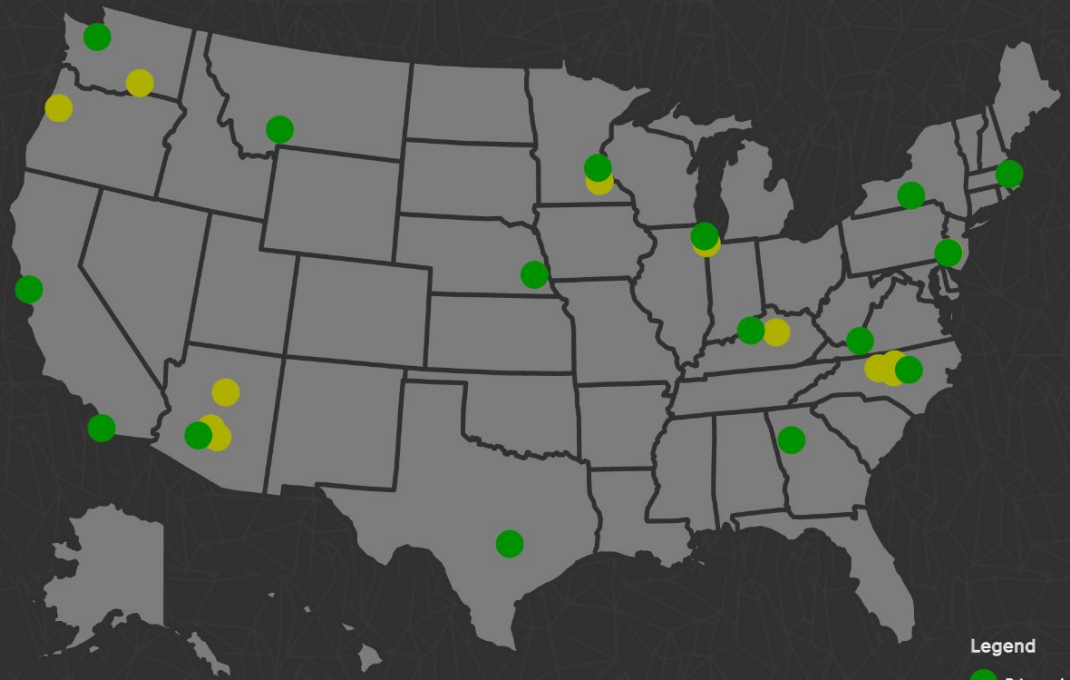

San Diego Nanotechnology Infrastructure (SDNI)

Soft and Hybrid Nanotechnology Experimental (SHyNE) Resource

Southeastern Nanotechnology Infrastructure Corridor (SENIC)

Texas Nanofabrication Facility (TNF)

Virginia Tech National Center for Earth and Environmental Nanotechnology Infrastructure (NanoEarth)

Stanford ONLINE

## Nano @ Stanford

This resource contains materials to prepare researchers to become effective users of the [nano@stanford](mailto:nano@stanford) nanofabrication and nanocharacterization tools and facilities, as well as to be useful to anyone wanting to learn about nanofabrication.

**Estimated 10 weeks**

5 hours per week

**Self-paced**

Progress at your own speed

**Free**

Access to course at no cost

### There is one session available:

5,471 already enrolled! After a course session ends, it will be [archived](#).

**Starts Nov 4**

**Enroll**

☐ I would like to receive email from StanfordOnline and learn about other offers.

### NanoSIMST at Stanford University

The nanofacilities at Stanford ([nano@stanford](mailto:nano@stanford)) are holding a four day Nanoscience Summer Institute for Middle School Teachers (NanoSIMST). [See what we did in 2018.](#)

June 24-27, 2019  
10am - 6pm  
Stanford University

Selected teachers will learn the underlying physical concepts in nanotechnology and nanoscience in simple terms. This unique learning experience can enrich your current courses through both deepening content understanding and instructional practices. Please keep in mind, housing stipends are not provided.

Jun  
**24**

**Nanoscience Summer Institute for  
Middle School Teachers  
(NanoSIMST)**

Content Deepening Courses

**APPLY NOW!**

#### Date and time

June 24, 2019 - June 27, 2019

#### Location

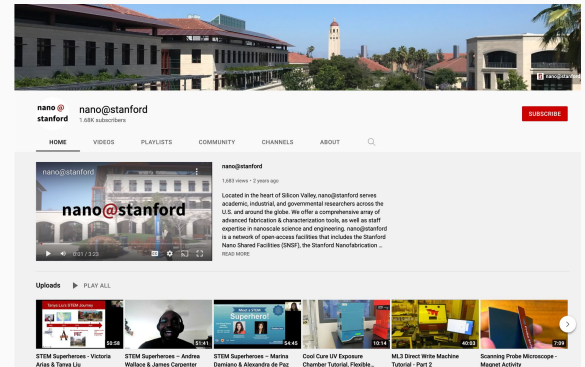

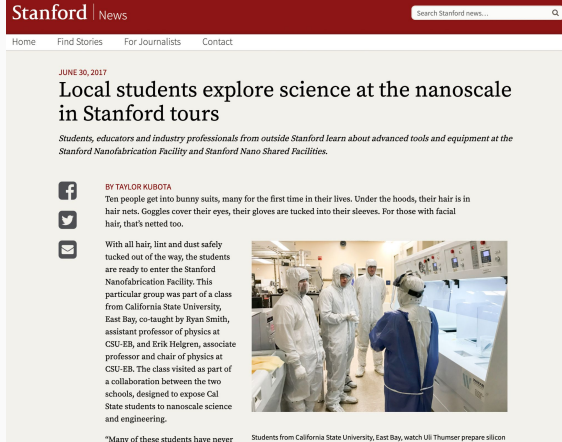

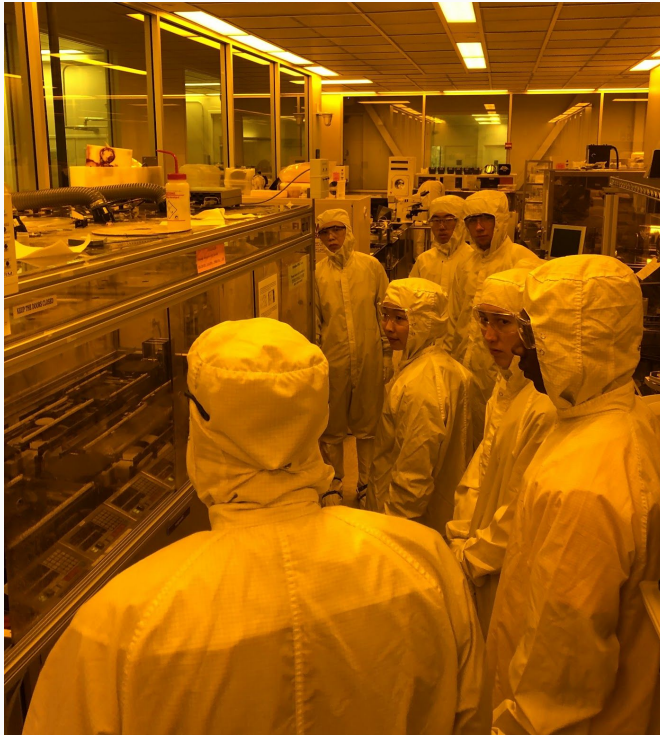

Stanford University

#### Cost

Receive stipend upon completion of workshop (\$400)  
and classroom implementation (\$200)

# Outreach

# What I Learned

- People management & influence
- Leadership skills
- Working with academics
- University operations & politics
- NSF grant process

**Industry:**  
Fast and slow

# Academic Partnerships & University Programs

Synopsys is an American electronic design automation company that focuses on silicon design and verification, silicon intellectual property and software security and quality.

Academic Programs

## Academic Programs

Synopsys academic programs provide qualified university and research institutions access to the software tools and technology needed to prepare highly skilled graduates who can meet difficult challenges ranging from electronic and optical design to static analysis for software quality and security. Our technology enables future hardware and software engineers to deliver Smart, Secure Everything – from Silicon to Software.

### Electronic Design

EDA software for digital, custom and analog/mixed-signal design, as well as prototyping, FPGA and TCAD.

[Learn More](#)

### Optical Design

Optical design software for imaging, illumination, automotive lighting, and photonic and optical network design.

[Learn More](#)

### Static Analysis

Static analysis software for developing and testing software code for quality and security.

[Learn More](#)

# What I Learned

So far...

- Corporate lingo is an entirely different language for each company
- High levels of security and privacy
- Global view of work & impact
- Working with a large amount of people
- Much more infrastructure is good and bad

# final takeaways

- Work hard and be nice
- “Yes, and” mindset
- Proactively ask for feedback
- Fit is important! The role and your life will change over time
- Stay at a job as long as you can add bullet points to your resume
- Your network is extremely helpful
- Don’t be afraid of cold calls or using LinkedIn, leveraging help from others

Thank you!
